JOURNAL OF RESEARCH IN SCIENCE TEACHING

Volume 1, 1963

ISSUE 1, MARCH

From the Editor 1

A Preliminary Statement on Research in Science Education: Joseph D. Novak 3

On This Occasion

- Prologue to the Future: Ellsworth S. Obourn 10
- The Beginnings of Organized Research in the Teaching of Science: Samuel Ralph Powers 11
- The Evolution of Science Education Research: Francis D. Curtis 13
- Famous Firsts of NARST: Hanor A. Webb 15
- Key to the Future of NARST: Clarence M. Pruitt 16
- To the New Generation in NARST: Ralph K. Watkins 17

The Latent Resources of the Child's Mind: Robert D. Hess 20

A Psychologist's Counsel on Curriculum Design: Robert M. Gagné 27

The *History of Science Cases for High Schools* in the Development of Student Understanding of Science and Scientists. A Report on the HOSC Instruction Project: Leopold E. Klopfer and William W. Cooley 33

Enlightened Opportunism: An Informal Account of the Elementary Science Summer Study of 1962: Phillips Morrison and Charles Walcott 48

Career Development of Science Teachers: Eugene C. Lee 54

New Concepts of Education of Science Teachers: R. Will Burnett .. 64

The Evaluation of Specific Educational Innovations: William W. Cooley and Leopold E. Klopfer 73

Selected High School Courses as Related to First Quarter Chemistry Marks: B. O'Neal Hendricks, Charles L. Koelsche, and Joseph C. Bledsoe 81

Experiments, Demonstrations, and Other Types of First-Hand Experiences: A Classification and Definition of Terms: Priscilla J. Eccles 85

Science, Engineering, and Technology as the Junior High Student Understands Them: John W. Renner 89

Book Reviews

- *Biological Education in American Secondary Schools 1890–1960*, Paul DeHart Hurd. Reviewed by Sidney Rosen 95
- *The Growth and Development of Basic Mathematical and Scientific Concepts in Children*, K. Lovell. Reviewed by Maurice Belanger 95

On Knowing: Essays for the Left Hand, Jerome S. Bruner. Reviewed by Douglas A. Roberts 96
Wilbur Lee Beauchamp, 1891–1962: John C. Mayfield 97

ISSUE 2, JUNE

From the Editor 99
The NARST and a Beckoning Future: Herbert A. Smith 101
American University Policies and Practice in Preparing Leaders in Science Education—A Research Report: James Rutherford 104
Response to the Rutherford Paper. I: Fletcher G. Watson .. 118
Response to the Rutherford Paper. II: Herbert A. Smith 121
Science as Doctrine or Thought? A Critical Study of Nine Academic Year Institutes: Howard E. Gruber 124
Some Evaluation Problems in a Course Content Improvement Project: J. Myron Atkin 129
Comment and Criticism
Novak's Research: Fletcher Watson 133
M. Ira Dubins 133
Burnett vs. Koerner: Earl Brakken 134
The Degree to which Children Conceptualize from Science Experience: David P. Butts 135
The Learning Requirements for Enquiry: Robert M. Gagné 144
The Measurement of the Effectiveness of a Teaching Machine Program in the Organic Chemistry Area of First Year College Chemistry: Molly Geller 154
Education and the Image of Man: Howard E. Gruber 162
Ninth vs. Tenth Grade Biology—A Comparison of Achievement: Louis L. Walters 170
Children and Their Science Teachers: Herman C. Kranzer 177
The Effect of Open-Ended Experiments in Chemistry on the Achievement of Certain Objectives of Science Teaching: George Charen .. 184
The Effect of Oklahoma State University Traveling Science Teacher Program on the Attitudes of High School Students toward Science and Scientists: Claude W. Gatewood 191
Book Reviews
Sarton on the History of Science, Essays by George Sarton, edited by Dorothy Stimson. Reviewed by Sidney Rosen 195
Scientists in Government, Earl W. Lindveit. Reviewed by Herbert A. Smith 195

ISSUE 3, SEPTEMBER

From the Editor 197
Educational Research Related to Science Instruction for the Elementary and Junior High School: A Review and Commentary: Herbert A. Smith 199

Predicting Achievement in Chemistry: A Model: Kenneth J. Jones 226
A Study of Team Teaching in High School Biology: Milton O. Pella and Chris Poulos 232
What Should We Teach in Biology?: Joseph Novak 241
The Curriculum in Science for an African School: Fletcher G. Watson 244
Comment and Criticism
On the Improvement of Research in Science Education: R. Will Burnett 253
Honors for Obourn: Lloyd K. Johnson 255
High School Chemistry: Is the Issue Still Debatable?: L. J. Thelen 256
Applications for Cooperative Research Funds: New Regulations: Department of Health, Education and Welfare 257
The Evolution of School Mathematics: Robert B. Davis 260
UICSM in Its Second Decade: William M. Golden 265
The University of Illinois Elementary-School Science Project: Report of the 1963 Writing Conference: Gail Pierce 270
The Earth Science Curriculum Project: Robert L. Heller 272
The Minnesota Mathematics and Science Teaching Project: P. C. Rosenbloom 276
The Princeton Junior High School Science Project: Frederick L. Ferris, Jr. 281
Book Review
Science and the Humanities, Moody E. Prior. Reviewed by Richard J. Loftus 285

ISSUE 4, DECEMBER

From the Editor 287
Shell Companies Foundation Helps NARST 287
Patrons 288
Comment and Criticism
More on Guidelines for Research: Alan H. McGowan 289
Science Education—A Scholarly Discipline?: Stephen S. Winter 290
On the Evaluation of New Curricula: Eugene C. Lee 291
Standards for Research: James J. Gallagher, Rodney F. Mansfield, and William R. Snyder 292
Curriculum Evaluation by Means of Behavioral Objectives: Henry H. Walbesser 296
The Effectiveness of a Unified Science in the High School Curriculum: Irwin L. Slesnick 302
A Concept of Matter for the First Grade: Herbert D. Thier, Cynthia Ann Powell, and Robert Karplus 315
The Direct Teaching of Critical Thinking in Grades Four Through Six: John M. Mason 319
Empiricism as a Function of Training in the Scientific Method: Eugene H. Kaplan 329
Teaching for Critical Thinking in High School Biology: William Kastrinos 341

Short Reports
Evaluation of an Auto-Instructional Program in General College Chemistry: James E. Banks 351
An Evaluation of the Chemistry Topics in the BSCS Blue Version: Burton E. Voss 352
Improved Science Education in the United States: Claude W. Gatewood and Ellsworth S. Obourn 355
